Duck Ponds are the perfect mini-berm containment for projects where storage space is limited. Small enough to fit in a cabinet or store on a shelf, a Duck Pond can hold various drum sizes with ease and affordability. Providing both reliable and reusable secondary containment for oils, fluids, and gasolines, ponds are easy to maneuver and the perfect quick-grab item that is rugged and ideal for small areas for rapid deployment.

FEATURES & BENEFITS:

- Can withstand extreme cold temperatures to -55°F / -48°C
- Available in various sizes
- Low-profile (4") sidewalls
- Leak tested

GREAT FOR:

- Quick use under leaking vehicles / machines
- Truck / tractor emergency drips
- A low-sidewall pop-up pool alternative
- Changing oils / fluids
- Protecting bottom surfaces while dispensing
- Performing maintenance on any item that has a spill potential

SORBENTS

SORBENT QUICK REFERENCE GUIDE

OIL ONLY - White and widely used for oils and hydrocarbons (available in meltblown and bonded.) Oil – Only Sorbents provide superior water resistance and can absorb up to 25 times their weight. Ideal for absorbing oil off of water during maintenance and repair when needing to avoid soaking up water and water-based fluids.

UNIVERSAL - These highly versatile sorbents are grey and used in most all industries. Bonded for added strength and durability, Universal sorbents are a great choice for absorbing a wide range of fluids. These will absorb both water and oil-based liquids.

AGGRESSIVE - Also known as Hazmat sorbents, can range in a variety of colors with yellow being the most standard for visible hazardous material recognition. Aggressive sorbents are best used for the clean-up of unknown, toxic, flammable, corrosive and chemical substance spills.

PADS

Meltblown polypropylene sorbent pads and rolls are the most cost-effective absorption technology available. Fast-wicking fibers allow them to absorb up to 25 times their weight!

COLLECTION PITS: BELOW-GROUND PRE-TREATMENT OF WASTEWATER

Reinforced, pre-fabricated fiberglass pits are an economical in-ground, oil-water separator as well as provide ideal pre-treatment of wash-water.

The 3-stage collection pit is designed with baffles and for Water Maze's proprietary oil-coalescing plates to be inserted into the center chamber for enhanced separation.

This fiberglass separator is significantly easier and less expensive to ship and install than shipping or constructing on site collection pits made of concrete. The reinforced fiberglass sidewalls prevent bowing and underground movement.

The fiberglass collection pit works best when combined with a catch basin and sump pit, which are both made of the same chemical-resistant, reinforced fiberglass.

The wash water flows into the catch basin, where solids drop to the bottom. The runoff then flows into the collection pit. As it passes through the baffles, oil and other debris are separated from the water. In some instances, this is all that is needed to meet discharge limits for the sewer. If needed, a sump pit may be used to transfer wastewater into a Water Maze water treatment system.

PIT CLEANER: FOR SLUDGE REMOVAL

Cleaning sludge from the bottom of a collection pit is neither easy nor fun.

But the Pit Cleaner makes it bearable.

An extended wand is attached to a pressure washer, with a minimum of 1000 PSI. The pressure is channeled so that it creates a vacuum, capable of suctioning mud and sludge from the bottom of a pit or even a pond.

The sludge is deposited into a porous collection bag, mounted on a hand truck, where the water drains out and the sludge is allowed to dry for eventual disposal.

PM-1000: AUTOMATIC SYSTEM FOR BIOREMEDIATION PIT MANAGEMENT

If you face a smelly mess every Monday morning from a forgotten wash-water collection pit, Water Maze has a solution for you in the Pit Management System.

The PM-1000D provides a fully automated, environmentally friendly and low-cost way to

Timers are located in a water-resistant control panel and automatically provide aeration and microbial injection.

manage standing wash water found in collection pits, tanks or sump drains.

It is designed to be integrated into most wash-water treatment systems utilizing aeration and automatic injection of a highly effective microbial agent (BioStax 1800) for eliminating oils, greases and other hydrocarbons and organics typically found in collection pits or sump drains.

BioStax 1800 has proven to be very effective in controlling odor and converting oils, greases, and hydrocarbons into harmless carbon dioxide and water.

The aeration further enhances the effectiveness of the microbes and provides odor control.

BIO-MEDIA: ALL-NATURAL SOLUTIONS FOR COLLECTION PITS & GREASE TRAPS

Water Maze provides a broad selection of bio-media used in bio-treatment systems, collection pits and even kitchen grease traps.

These all-natural products are made up of a special blend of non-pathogenic, non-toxic bacteria

designed for use in applications where pressure washers are typically found.

The products include:

■ **BioPuck HC:** An award-winning, microbial blend designed for naturally removing oil, grease and other hydrocarbons from a was-water collection pit; apply 1-2 tablets per month; available in package of four pucks; 4-pack package comes with containment nets and BioNutrient.

■ **BioPuck GT:** Bacterial blend formulated for naturally eliminating fats, cooking oils and greases found in a kitchen or food processing facility.

■ **BioStax 1800:** A two-part proprietary liquid blend of a non-toxic, non-pathogenic bacterial concentrate that is designed for slow release of microbes into the Pit Management System. Comes in a kit made up of two 8-ounce bottles (designated "A" and "B") for mixing with water to make 5 gallons. Helps to control odor and the breakdown of hydrocarbons, greases and oils. Replaces BioStax 900. Certified by the ATCC as gram positive, class 1, pathogen-free organisms.

■ **BioStax 100 Hawaiian Blend:** Designed for use in systems installed in Hawaii.

■ **BioNutrient:** The Water Maze BioNutrient is a powder concentrate that mixes with water and enhances the effectiveness of the bioremediation process.

pH PERMISSIVE SYSTEM: AUTOMATICALLY ADJUSTS WATER pH

A pH Permissive System automatically monitors and adjusts the pH in a waste stream enhancing the effectiveness of wastewater treatment systems, including an evaporator.

The unit continuously circulates the wastewater monitoring and injecting pH adjusting agents using two chemical pumps. It also has an alarm for alerting the operator if the pH level is not reached in a set time eliminating the maintenance headaches sometimes associated with manually operated recycling systems.

CLARIFIERS: SOLIDS / OIL & WATER / SEPARATION - DISCHARGE SYSTEMS

Water Maze CL and CLT clarifier systems are modular components that can be applied as pretreatment, post-treatment, or as a stand alone treatment system. All units utilize cross-linked polyethylene cone-bottom tanks with steep slopes (up to 55 degrees) for maximum solids separation. Each tank has a full open top with removable lid and includes heavy duty metal stand with cradle. Each model provides features and benefits to match your application requirements.

The **CLT-300** model includes:

A 300-gallon tank with lid; 3" inlet and 1 1/2" outlet bulkhead fittings; and manual purge valve at the bottom

The **CLT-600** model includes:

A 600-gallon tank with lid; manual purge valve at the bottom; 3" inlet and outlet bulkhead fittings; internal downward piping arrangement; and air diffuser stone mounted inside the tank.

The **CL-30A** model includes:

A 600-gallon tank with lid; 1 1/2" inlet and outlet bulkhead fittings; a top divider cone and 2 lower coalescing cones; oil skimmer cone with outlet piping; 26-gallon oil decanter reservoir; 165-gallon poly tank with a 1/2 HP sump pump mounted inside; manual purge valve at the bottom; and sludge tub / dewatering container.

RETROFIT KITS FOR AUTOMATING SYSTEMS

The AMC-1000 is an in-field retrofit kit that automates the discharge function on Water Maze systems to dispense wastewater and sludge from a system for disposal.

The AMC (Automatic Maintenance Control) kit is designed to automate the purging of the build up of solids in a cone-bottom tank of a water treatment system, such as a CLT-300, CLT-600, CL-30 or any above ground tank. The AMC operates on stand-alone 120V electrical.

■ **AMC-1000 (1.103-406.0):** This air-operated kit comes mounted in a NEMA box. A microtimer causes the air-activated purge valve to open discharging the sludge from the tank. Air supply (3 CFM @ 80-100 PSI) must be supplied by the customer.

IPF2-20D: INDEXING POLISHING FILTER

The IPF solids dewatering unit utilizes inexpensive fabric paper to filter out solid particles. Fabric paper, which is supplied in 5, 20, and 50 micron sizes, is automatically indexed onto a recessed conveyor belt made of high tensile, non-metallic material. As water and solid particles drain through the fabric paper, solids are retained by the fabric paper. As the fabric paper blinds over, the water level will rise, a float will actuate a drive motor and gear system, the conveyor belt will index forward allowing the spent paper to fall into a collection container and new paper to index onto the conveyor belt. The IPF can be applied for pretreatment, post treatment, or as a stand alone treatment system.

The equipment specifications include:

- made of industrial grade components;
- carbon steel exterior with a stainless steel interior that protects the wetted surfaces from rusting;
- all carbon steel surfaces are protected with a two part Zinc Epoxy Powder Coat finish;
- the load bearing side (top side) of conveyor belt is fully supported to eliminate belt sagging;
- the drive motor is exterior mounted with a covered housing to protect it from moisture and it has an ETL / UL approved safety shut-off switch;
- the paper roll enclosure includes an electronic sensor to signal "low paper" conditions to an external device (supplied by others)
- includes (4) four adjustable legs to change the elevation of the unit
- includes a collection container for spent paper and sludge
- NOTE: Fabric paper is not included, must be purchased separately.

OZONE GENERATORS: FOR ADDED WATER CLARITY

This self-contained ozone generator is ideal as a stand-alone system for ridding wastewater of odor and bacteria.

Ozone works up to 1000 times faster than chlorine, and other sanitizers, in killing bacteria without creating harmful byproducts. It also acts as a deodorizer.

Model 30-7501 includes an enclosed cabinet painted with a powder coat finish.

A unique mixing procedure ensures 99% contact by the bacteria-killing ozone with the wash water—a procedure far more effective than bubbling ozone into a tank.

Other features include: 3/4 hp circulation pump; 24-hour timer control; and 4 ultraviolet lamps which create 24 grams of ozone per day.

Ozone generators are also available for use in existing systems:

- **Ultraviolet Systems:** Economical, high-efficiency generators with one, or four lamps producing up to 24 grams of ozone per day.

*Other models with higher ozone output are available through our specials dept. See page 20 for details.

SPECIAL OZONE SYSTEMS: DELIVERS UP TO 72 GRAMS PER DAY OF UV OZONE

This self-contained ozone generator system is ideal as a stand-alone system for ridding wastewater of odor and bacteria. Ozone works up to 1000 times faster than chlorine and other sanitizers in killing bacteria without creating harmful by-products. It also acts as a deodorizer.

The system utilizes (3) three Water Maze Series 400 UV ozone generators and one control cabinet. Two of the ozone generators will need to be field installed on a wall-mount bracket (bracket not included). The standalone control cabinet includes a circulation pump, 24-hour timer control, and inlet / outlet PVC connections. A larger piping manifold with mazzei injectors are supplied to ensure 99% contact by the bacteria-killing ozone with the wash water - a procedure far more effective than bubbling ozone into a tank.

The cabinet enclosure is painted with a powder coat finish. Each ozone generator cabinet is made of stainless steel.

WATER BLASTER: FOR PRE-WASHING

When heavy equipment and vehicles are laden with loads of dirt and mud, water volume is more effective than high pressure for a thorough cleaning.

The Water Blaster delivers up to 25 GPM of water volume—nearly 6 times more than most pressure washers—along with 500 PSI of pressure to knock off heavy dirt with ease.

Water Blasters come standard with:

- Two electrical configurations of an industrial-duty 10 HP motor with on-off motor control for convenience in washing away from the unit;
- Rugged self-priming, high-pressure diaphragm pump mounted on vibration isolators;
- Liquid level switches to ensure flow of water; and
- 100 ft. of 3/4-inch, abrasive-resistant hose with a variable fan wand.

ENVIRONMENTAL CONTAINMENT RACKS

The Water Maze above ground containment rack systems makes shipping and installing a wash rack easier than ever. With no permitting required, this bolt together system can be installed in a matter of hours.

The low profile modular design with a maximum deck height of 6 inches (15.24 cm) can be purchased in various sizes and configurations to meet your current site requirements. The modular design also allows for shipping under LTL freight rates, or inside of an ocean cargo container for export purposes.

FEATURES AND BENEFITS:

- Multiple Ramp options available:
Drive-On / Back-Off or Drive-Through
- Available in 9' wide and 18' wide models
- Diamond plate deck surface
- Deck height 6"

DRIVE-ON / BACK-OFF CONFIGURATION (18 FEET WIDE MODEL)

DRIVE-THROUGH CONFIGURATION (18 FEET WIDE MODEL)

SHOWN W/ OPTIONAL CANOPY

DRIVE-ON / BACK-OFF CONFIGURATION (9 FEET WIDE MODEL)**CONVEYOR OPTION (FOR 18 FEET WIDE OR GREATER CONTAINMENT RACKS)**

CONTAINMENT RACK SPECIFICATIONS - 9 FEET WIDE:

DIMENSIONS:	Inside width= 9 feet (2.743 meters), Inside lengths: increments of 7 feet (2.133 meters)
CAPACITY:	15,000 lbs. (6,818 kgs.) weight support distributed over a typical four-wheeled point contact in a 6' x 6' (1828 mm x 1828 mm) area.
MODULAR DECK & TROUGH DESIGN:	Lower deck consists of one section that is 9' (2.743 meters) wide x 7' (2.133 meters) long and incorporates a center trough that is approximately 24" (609 mm) wide x 4.5" (114 mm) deep and includes removable steel gratings that run full length. The outer deck height is 6" (152 mm) high and tapers towards the center trough. Multiple sections are bolted together (using alignment pins and seal strips) to match the overall deck length requirements.
OVERSPRAY WALLS:	6' high tubular steel with galvanized sheet metal
LAYOUT (options):	<i>Drive-on / back-off</i> with ONE SET of low angle approach ramps and overspray walls on three sides. <i>Drive-through</i> with TWO SETS of low angle approach ramps and overspray walls on two sides
MATERIALS OF CONSTRUCTION:	Custom U-channel steel fabricated substructure with diamond tread plate surface; tubular steel overspray walls with galvanized sheet metal covering.
METAL FINISHING:	Steel components are deep cleaned with a phosphate cleaning solution and then painted with a 2-step epoxy paint process. Diamond tread deck surface has a grit impregnated coating

CONTAINMENT RACK SPECIFICATIONS - 18 FEET WIDE:

DIMENSIONS:	Inside width: 18 feet (5.486 meters) Inside lengths: increments of 7 feet (2.133 meters)
CAPACITY:	60,000 lbs. -27,273 kgs. weight support (15,000 lbs. – 6,818 kgs. for typical four-wheeled point vehicle)
MODULAR DECK & TROUGH DESIGN:	Lower deck consists of sections. Section A = 10' wide x 7' long (3.04 m x 2.133 m), and Section B = 8' wide x 7' long (2.438 m x 2.133 m). The 10' wide section incorporates a center trough that is approximately 24" (609 mm) wide x 4.5" (114 mm) deep and includes removable steel gratings that run full length. The outer deck height of each section is 6" (152 mm) high and tapers towards the center trough. Multiple sections of A and B are bolted together (using alignment pins and seal strips) to match the overall deck length requirements.
OVERSPRAY WALLS:	6' high tubular steel with galvanized sheet metal 12' high tubular steel with outer support braces (OPTIONAL)
LAYOUT (options):	<i>Drive-on / back-off</i> with ONE SET of low angle approach ramps and overspray walls on three sides. <i>Drive-through</i> with TWO SETS of low angle approach ramps and overspray walls on two sides
MATERIALS OF CONSTRUCTION:	Custom U-channel steel fabricated substructure with diamond tread plate surface; tubular steel overspray walls with galvanized sheet metal covering.
METAL FINISHING:	Steel components are deep cleaned with a phosphate cleaning solution and then painted with a 2-step epoxy paint process. Diamond tread deck surface has a grit impregnated coating

AVAILABLE OPTIONS:

- **CUSTOM DECK WIDTHS** available upon requests.
- **INTEGRATED UNDERCARRIAGE RINSE SYSTEM:** 60 GPM @ 100 PSI, consisting of:
 - A 10' long spray bar system with 10 spray nozzle pockets welded into the deck plate so all the nozzles are sub surface.
 - The above is embedded into one set of the above deck sections (an "A" and "B" section).
 - A pumping system: centrifugal booster pump with enclosed impellers.
- **DUAL DIAPHRAGM PUMP RECOVERY SYSTEM:**
 - Includes heavy duty suction pumps (x2) that are capable of pumping heavy solids at a flow rate to keep up with the above undercarriage rinse system; flow activation of pumping system using PLC electrical interface with the customer supplied pressure washer and/ or water blaster system; hoses and hose connections from one end of the drain trough to the pump rack.
- **INTEGRATED CONVEYOR SYSTEM:** Automatically removes solids from the center trough system. Available for 18 feet wide or greater containment racks.
- **CANOPY COVERS:** Available to fit all models.
- **TREATMENT & DISCHARGE SYSTEMS**
- **RECYCLE SYSTEMS**

CONTAINERS

OCEAN CARGO CONTAINERS – (MODIFIED) EQUIPMENT STRUCTURES

As an alternative to constructing an onsite building, Water Maze offers 20 foot, or 40 foot long ocean cargo containers (new or used) modified to meet your specific site requirements. Typically, local construction permits are not required when installing this type of structure.

FEATURES AND BENEFITS:

- New, or used in refurbished condition
- Wooden floor
- Electrical breaker panel (up to 200 amps)
- Interior ceiling lights, fluorescent (20 foot x 2) (40 foot x 4)
- Painted exterior
- Recessed plumbing

AVAILABLE OPTIONS:

- Electrical panel (up to 200 amps)
- Electrical outlets: 120 volt, 230 volt, 460 volt
- Electric conduits and Unistrut anchor channels with clamps
- 36" man-door(s) – metal lined, exterior grade
- Louvered vents, fans
- Heating & air conditioning systems
- Interior insulation with Kemplite lining (top and sides)
- Cargo worthy certification
- Custom modifications available upon request

Detergents, Defoamers & Additives

For Wastewater Treatment Systems

QUICK RELEASE DETERGENTS - FOR WASH WATER APPLICATIONS

Enviro-Clean

Water Maze Enviro-Clean is an all-purpose detergent designed to be used through a pressure washer and still have the quick release properties for use with a wash water recycling system or oil-water separator. It is completely biodegradable and phosphate free.

5 gal. (PN 8.916-591.0) List Price: \$75.00 | 55 gal. (PN 8.916-594.0) List Price: \$685.00

Enviro-Clean+Plus

Water Maze Enviro-Clean+Plus combines both the cleaning power of other detergents with oil-release properties to enhance the effectiveness of a wash water recycling system or oil-water separator. In addition to being biodegradable, it has low-foaming and low-phosphate characteristics and contains no caustics or butyls.

5 gal. (PN 8.916-589.0) List Price: \$45.00 | 55 gal. (PN 8.916-592.0) List Price: \$350.00

Enviro-Degreaser

Water Maze Enviro-Degreaser is a potent degreaser that also has quick-release properties so it is ideal for use when water is being treated by a wash water recycle system or oil-water separator. Besides being biodegradable, Water Maze Enviro-Degreaser is phosphate free and does not react photochemically so it's enviro-safe.

5 gal. (PN 8.916-590.0) List Price: \$60.00 | 55 gal. (PN 8.916-593.0) List Price: \$500.00

DEFOAMERS

5600 Defoamer

Water Maze 5600 is a fast-acting defoamer concentrate that quickly suppresses froth and suds often found in waste streams bound for processing through a wastewater evaporation system. Water Maze 5600 can also be used in aqueous-based wastewater treatment systems.

1 gal. (PN 8.719-138.0) List Price: \$43.00 | 5 gal. (PN 8.719-139.0) List Price: \$195.00

55 gal. (PN 8.719-140.0) List Price: \$1,875.00

Defoamer A-32

Defoamer A-32 is a water dispersible defoamer/antifoam that is highly effective in controlling foam in wastewater evaporators processing metal working fluids. Defoamer A-32 is particularly effective in wastewater streams containing semi-synthetic and synthetic metal-working compounds. It can also be used in a wide variety of other aqueous based wastewater systems.

5 gal. (PN 8.749-779.0) List Price: \$385.00 | 55 gal. (PN 8.749-778.0) List Price: \$3,895.00

ADDITIVES

Liquid Alum pH Adjusting Agent (Acidic) - For use in all Water Treatment Systems

Water Maze Liquid Alum is a 20% liquid aluminum sulfate solution for use as a pH adjust chemical or a coagulant in water treatment. Best results are obtained when Water Maze Liquid Alum is injected directly into the wastewater stream on a continuous basis.

5 gal. (PN 8.749-550.0) List Price: \$86.00 | 55 gal. (PN 8.749-549.0) List Price: \$360.00

No Rust Corrosion Inhibitor - For use in Evaporators w/ Carbon Steel Tanks

Water Maze's No Rust concentrated corrosion inhibitor is designed to provide rust protection in Water Maze industrial wastewater evaporators. When added continuously this unique blend of chemicals will prevent corrosion to the wetted metal surfaces of a wastewater evaporator.

5 gal. (PN 8.749-782.0) List Price: \$475.00

OxiMaze+ Oxidizing Agent - For use in all Water Treatment Systems

A powerful new oxidizer from Water Maze to be used as a sanitizer for very effective odor control within wastewater treatment systems. OxiMaze+ is a much safer and more effective alternative to chlorine (sodium hypochlorite). OxiMaze+ is non-toxic, non-corrosive and has a much higher reactivity rate than chlorine.

5 gal. (PN 8.750-499.0) List Price: \$180.00 | 55 gal. (PN 8.750-500.0) List Price: \$1,850.00

CHEMICAL COMPATIBILITY KEY AND USER NOTE:

This report is offered as a guide and was developed from information, which, to the best of ENPAC's knowledge, was reliable and accurate. Due to variables and conditions of application beyond ENPAC's control, none of the data shown in this guide is to be construed as a guarantee, expressed or implied. ENPAC, LLC assumes no responsibility, obligation, or liability in conjunction with the use or misuse of the information.

The data shown is the result of laboratory tests obtained from leading chemical companies and independent reports that are intended to serve only as a guide. Testing is not conducted by ENPAC, LLC. No performance warranty is intended or implied. Confirmation of the validity and suitability in specific cases should be obtained. When considering flexible containment for specific applications, it is suggested that a fabric sample be tested in actual service before specification. Where impractical, tests should be devised which simulate actual service conditions as closely as possible.

Ratings are based on visual and physical examination of samples after removal from the test chemical. Results represent the material's ability to retain its performance properties when in contact with the indicated chemical.

The degree of chemical attack on any material is governed by the conditions under which it is exposed. Exposure time, temperature, and size of the area of exposure usually varies considerably in application, therefore, this table is given and accepted at the user's risk.

DETAILED KEY:

Y = Products should be suitable for prolonged or repeated contact with these substances (under the specified conditions).

S = Products may be suitable for intermittent contact; however, some deterioration in properties may occur. The user should perform qualification tests before or during usage of the container.

N = Substances aggressively attack the product or have vapor pressures incompatible with closed containers.

CODES AND REGULATIONS

DOT 49 CFR 173.3 (c) Salvage Drums:

SUMMARY: Packages of hazardous materials that are damaged, defective, or found leaking and hazardous materials that have spilled or leaked may be placed in a metal or plastic removable head salvage drum that is compatible with lading and shipped for repackaging or disposal under the following conditions:

- Drum must be a UN 1A2, 1B2, 1N2 or 1H2 tested and marked for Packing Group III or higher performance standards for liquids or solids and a leakproof test of 20 kPa (3 psi).
- Capacity of the drum may not exceed 450 L (119 gallons).
- Each drum shall be provided when necessary with sufficient cushioning and absorption material to prevent excessive movement of the damaged package and to eliminate the presence of any free liquid at the time the salvage drum is closed. All cushioning and absorbent material used in the drum must be compatible with the hazardous material.

- Packaging must be marked "SALVAGE" or "SALVAGE DRUM".

(The overpack requirements of Section 173.25 do not apply to drums used in accordance with this paragraph.)

EPA 40 CFR 264.175 Containment:

Ref (b)(3) The containment system must have sufficient capacity to contain 10% of the volume of containers or the volume of the largest container, whichever is greater.

EPA 40 CFR 112 Spill Prevention, Control and Countermeasure (SPCC):

SUMMARY: The purpose of the SPCC regulation is prevention of oil discharge into navigable waters and related areas, rather than cleanup after a spill has occurred. The regulation generally affects all facilities with at least 1,320 gallons above ground storage capacity, or 42,000+ gallons underground storage capacity. The SPCC requires affected facilities to prepare and file an action plan (the SPCC Plan).

Some affected facilities include: onshore and offshore drilling, platforms, barges and mobile facilities; fixed and mobile onshore or offshore production; oil refining and storage; any industrial, commercial, agricultural or public facility that uses or stores oil; some waste treatment operations; loading racks, transfer hoses and related equipment; vehicles and pipelines. Oils, fats and greases of any kind or in any form are specifically included in the regulation.

The SPCC Plan must include elements such as: Operating procedures to prevent oil spills; Control measures to prevent spilled oil from entering surface water; Countermeasures such as Secondary Containment for spills and bulk storage compliance; Professional Engineer certification; Management approval; Facility inspections; Security; Training and more. More information is available at www.epa.gov/oilspill.

EPA 40 CFR 122.26 Stormwater Regulations, National Pollutant Discharge Elimination System (NPDES):

SUMMARY: The NPDES permit program controls water pollution by regulating point sources and non-point sources that discharge pollutants into United States waters. These regulations are a key component of EPA's Clean Water Act. The goal is to protect the quality of waterways by reducing the discharge of sediment, oil and chemicals into storm drains, surface and ground waters.

NPDES requires Minimum Control Measures to be put into place by activities in affected Urbanized Areas (UA). Visit www.epa.gov/owm (US EPA Office of Wastewater Management), Appendix 6 to determine particular affected places.

This program includes the development and implementation of the Stormwater Pollution Prevention Plan (SWPPP). The SWPPP identifies: Potential Sources of Pollution and Exposed Materials; a history of past spills and leaks; BMPs; Non-Structural controls (Good Housekeeping Practices, Spill Prevention and Response); Structural controls such as Containment including Pollution Incident Prevention Plans (PIPP) and Spill Prevention, Control, and Countermeasures (SPCC) plans.

UFC 79.406 Universal Fire Code:

SUMMARY: When used as a substitute for spill and damage control and secondary containment, pallets shall comply with: liquid-tight sump; sump capacity of at least 66 gallons; compatible substances; provide sump protection from rain water.

NFPA 30 Flammable and Combustible Liquids Code:

SUMMARY: Warehouses, separate buildings containing flammable and combustible liquids whose flash point does not exceed 100°F.

NFPA 70 National Electrical Code:

SUMMARY: Covers the installation of electrical conductors, equipment, and raceways; signaling and communications conductors, and optical fiber cables.

NFPA 400 Hazardous Materials Code:

SUMMARY: Applies to the storage, use, and handling of hazardous materials in all occupancies and facilities including nitrites, corrosives, flammables, peroxide formulations, oxidizers, water-reactives, compressed gases, and cryogenic fluids.

09/14

OSHA 29 CFR 1910.253 Storage of Cylinders:

SUMMARY: Cylinders shall not be kept in unventilated enclosures such as lockers and cupboards. (b)(2)(ii) Cylinders should be kept at least 20 feet (6.1m) from highly combustible materials, should be placed away from elevators, stairs and gangways. (b)(3)(i) For storage in excess of 2,000 cubic feet (56m(3)) total gas capacity of cylinders or 300lbs (135.9kg) of liquefied petroleum gas, separate rooms or compartments shall be provided.

FM (Factory Mutual) Global 6049:

SUMMARY: A combination of pressure-relieving (venting) and pressure resisting exterior construction which is intended to mitigate over-pressure damage to the building in case of a vapor-air deflagration. The design of relieving and resisting features must be engineered to account for fuel, surface area, or the enclosure, vent area and structural loads imposed by the deflagration.

HOMELAND SECURITY AUTHORIZED EQUIPMENT LIST

SECTION 7-DETECTION EQUIPMENT

7.2.2.4: Kit, Chemical Sampling/Evidence, Containment Vessels (AEL Ref# 07CS-01-KVES)

IMPAC PRODUCTS:

- Poly-Overpack® Salvage Drums sizes 20-gallon - 110-gallon.

SECTION 8-DECONTAMINATION EQUIPMENT

8.2.6: Equipment, Technical Decontamination-Wet (AEL Ref# 08D2-06-TDEW).

IMPAC PRODUCTS:

- | | | |
|--|--------------------------------------|--------------|
| • Stinger Yellow Jacket™ Decontamination Berms. | • SpillPal™ | • QVAC™ 100 |
| • Stinger™ Containment Berms, both the snap-up and snap-foam styles. | • Prowler™ Pools | • Sorbents |
| | • Hazmat Pool™ | • Spill Kits |
| | • 2-, 4-, 6-, & 8-Drum Workstations™ | |

8.2.11: Device, Liquid Decontamination Equipment (AEL Ref# 08D2-10-LDCD)

IMPAC PRODUCTS:

- | | | |
