

PRODUCT DETAILS

Power Kleen Extra is a highly concentrated, high alkaline cleaner / degreaser for use in pressure washing, steam cleaning and manual applications. Power Kleen Extra is used primarily in food production facilities and food service operations to remove grease and carbonized soils from hood and duct systems. Power Kleen Extra is formulated to penetrate and remove the heaviest accumulations of animal and vegetable oils and greases from stainless steel hood, ducts, filters and fans. Typical Industry procedures for application and precautions should be followed. Remove the fan from ductwork, tarp and tape under the hood with plastic sheeting and capture all drain-off and dispose of in a sanitary sewer. Care should be taken if Power Kleen Extra is used on any surface other than stainless steel. Painted metals, aluminum and other soft metals will be corroded or etched.

DIRECTIONS FOR USE

The actual concentration will be determined by the amount and types of soils present and the equipment being used.
Steam Cleaners & Pressure Washers: Adjust the dilution of the product to achieve 1 - 2 oz of product at the end of the wand. Apply with low pressure, working from bottom to top and rinse with high pressure rinsing from the top down.
Mop Buckets & Manual applicators: Mix 3 - 6 oz. of product per gallon of water. Apply to the surface with mop, stiff bristle brush or self-pressurized sprayer. Scrub the surface to loosen soils and rinse well.

- PRESSURE WASHERS
- STEAM CLEANERS
- WASHWATER RECYCLING and FILTRATION SYSTEMS
- SOAPS, ACIDS, DEGREASERS, WASH MITTS and BRUSHES
