

### DIRECTIONS FOR USE

Prepare the roof by removing as much moss and debris from the roof by sweeping or blowing with a leaf-blower. Tarp plants, bushes and grass beneath the area to be worked to prevent overspray from reaching the ground. **Overspray and runoff of this mixture is toxic to plants and animals.** Premix Roof Moss Cleaner, 1 part cleaner to 4 parts water in a sprinkling can, hose-end sprayer or pressurized tank sprayer. Apply to the roof to thoroughly wet the moss at the rate of 1 gallon of mixture per 100 sq. ft. Allow the moss to turn brown. This could take several days. Use a grass rake or push broom to remove dead moss. Re-apply Roof Moss Cleaner mixture to any areas that have moss remaining. Be careful not to brush or rake composition roofing too aggressively to prevent damage to the shingles.
