

DIRECTIONS FOR USE

DO NOT run product through a pressure washer pump. When using with hot water, dilute acid by pouring it into a pre-measured amount of water to achieve a final dilution of approximately 10:1. If using with cold water, achieve a final dilution of approximately 10:1. If needed, add more Acidic Masonry Cleaner for extra strength on heavier soils.

APPLICATION PROCEDURE: All personnel must be protected by rubber or polyethylene suits and gloves, face shield and protective head gear. Avoid direct contact with liquid or vapors. Protect all adjacent areas from over-spray. Cover glass, aluminum, plants, painted surfaces and vehicles with plastic sheets or tarps. A test patch in an out of the way area is strongly suggested to be sure that correct dilution of product is being used. Additional test patches should be performed whenever you change to a new type of surface. Spray on surface with an acid-resistant airless low pressure sprayer from the bottom up allowing a short dwell time of 2 - 5 minutes. **DO NOT** allow acid to dry on surface. Then follow with a thorough fresh water rinse. Continue to rinse surface until all sudsing stops. **DO NOT** allow acid to contact glass, anodized aluminum or magnesium surfaces as it **can cause etching**.

Net Contents: 1 Gallon (128 fl. oz.) **SP-35-01**

- PRESSURE WASHERS
- STEAM CLEANERS
- WASHWATER RECYCLING and FILTRATION SYSTEMS
- SOAPS, ACIDS, DEGREASERS, WASH MITTS and BRUSHES

ACIDIC MASONRY CLEANER

CONCRETE, BRICK AND TERRAZO ACID WASH

A COMBINATION OF ACIDS AND WETTING AGENTS TO CLEAN AND BRIGHTEN CONCRETE, BRICK AND TERRAZO SURFACES. BALANCED TO DO AN EFFECTIVE CLEANING JOB.

MANUFACTURED FOR:
SEATTLE PUMP AND EQUIPMENT CO.
2222 15th Avenue West
Seattle WA 98119
1 MILE SOUTH OF THE BALLARD BRIDGE
206-283-5252 / 800-863-7867

CAUTION

CONTAINS: HYDROFLUORIC ACID & HYDROCHLORIC ACID

Fatal if taken internally. Highly corrosive to skin. May cause blindness if splashed into eyes. Use goggles, rubber gloves, and other protective clothing when handling.

EMERGENCY PROCEDURES FOR CONTACT WITH

Remove patient from contaminated atmosphere and removing acid from skin or eyes is of importance.

SKIN: Wash with soap and water.

EYES: Flush with water for 15 to 30 minutes.

INHALATION: Remove to fresh air.

INGESTION: DO NOT INDUCE

VOMITING. Give several glasses of water for dilution effect. Seek medical attention immediately.
