

DIRECTIONS FOR USE

DO NOT run product through a pressure washer pump. When using with hot water, dilute acid by pouring it into a pre-measured amount of water to achieve a final dilution of approximately 100:1. If using with cold water, achieve a final dilution of approximately 50:1. If needed, add more Aluminum Brightener Acid Wash for extra strength on heavier soils.

APPLICATION PROCEDURE: Apply from the bottom up allowing a short dwell time of 30 seconds to 1 minute. **DO NOT** allow acid to dry. Then follow in the same manner with an application of an alkaline cleaner (suggest Marine Cleaner Phosphate Free). Then a thorough fresh water rinse. **DO NOT** allow acid to contact glass, anodized aluminum, or magnesium surfaces as **it can cause etching**.

FOR GENERAL CLEANING OF DECKS, WHEELS, TRAILERS, AND ASSORTED ALUMINUM SURFACES: Use 3 to 6 ounces per gallon of water.

FOR INDUSTRIAL USE ONLY

ALUMINUM BRIGHTENER ACID WASH

A COMBINATION OF ACIDS AND WETTING AGENTS USED TO CLEAN AND BRIGHTEN ALUMINUM. FOR USE ON TUGS, SHIPS, BOATS, TRAILERS, TANK TRUCKS, WHEELS AND OTHER ALUMINUM SURFACES. BALANCED TO DO AN EFFECTIVE CLEANING JOB WHERE FAST CLEANING AND SUPER BRIGHTENING POWER ARE ESSENTIAL. QUICKLY CUTS THROUGH ROAD FILM AND DIESEL SMOKE.

CAUTION
 CONTAINS: HYDROFLUORIC, SULFURIC, & PHOSPHORIC ACIDS

Will **ETCH** glass. Fatal if taken internally. Highly corrosive to skin. May cause blindness if splashed into eyes. Use goggles, rubber gloves, and other protective clothing when handling.

EMERGENCY PROCEDURES FOR CONTACT WITH

Remove patient from contaminated atmosphere and remove acid from skin or eyes is of importance.

SKIN: Wash with soap and water.

EYES: Flush with water for 15 to 30 minutes.

INHALATION: Remove to fresh air.

INGESTION: DO NOT INDUCE VOMITING. Give several glasses of water for dilution effect. In all of the above cases seek medical attention immediately.
