

DIRECTIONS FOR USE

DESIGNED FOR USE WITH PRESSURE WASHERS

ONE-STEP SYSTEM: Always apply to a dry painted or non-painted surface. Do not pre-wet surface as this will inhibit cleaning performance. Using low pressure apply to the surface from bottom to top, to the front, sides and rear. Allow a brief penetration period, then switch back to high pressure and rinse thoroughly the House, Deck, Building or Vehicle.

TWO-STEP SYSTEM: Pre-mix at about the same dilution as the Acid Wash (Aluminum Brightener). Switch hose to alkaline soap and apply to area coated with acid (DO NOT let acid dry on surface or let HF get onto glass as it will etch glass!). Apply to all areas including the glass. Rinse thoroughly with clear water using the pressure washer at high pressure. Rinse from top to bottom, then continue on with the remainder of the vehicle or trailer.

Use dilution of 1:10 to 1:60, depending on type and amount of soil to be removed.

FOR COMMERCIAL & INDUSTRIAL USE ONLY

MANUFACTURED FOR:
SEATTLE PUMP AND EQUIPMENT CO.
2222 15th Avenue West Seattle WA 98119
1 MILE SOUTH OF THE BALLARD BRIDGE
